

Z-LINK

MULTI-PURPOSE RESPIRATOR

APPLICATIONS

From welding and grinding to chemical handling, the Z-Link serves a wide spectrum of industries and applications.

DESCRIPTION

The Z-Link is the result of extensive user testing in demanding, multi-purpose welding environments. The advanced angular dependence control guarantees uniform shading and distortion-free vision, allowing you to work comfortably and effortlessly for hours across different angles.

The comfort padding customisation and product accessory combinations guarantees the perfect fit and match for your environment. Breakthrough helmet weight distribution design and lightweight, unobtrusive accessories eliminate the stress on the head and neck.

KEY FEATURES AND BENEFITS

- Choice of 6 anti-fog, scratch resistant ANSI Z87+ visors.
- Operate with widened perspective and greater visibility. Exceptional downward and peripheral vision.
- Visor that hinges open for free air breathing and easy communication.
- Visor lift to easily raise and lower the welding visor.
- Air deflector for airflow adjustment.
- Reversible brow pad allows the choice of soft touch (smooth) or optimum comfort (fluffy) finish.
- Fixed jaw ensures secure cape attachment.
- Molded helmet padding fits closely to the operators head.
- Polystyrene top liner for impact absorption.
- Swivel inlet fitting for easy breathing tube attachment
- Ratchet adjustable padding system creates secure custom fit.
- Choice of 2 cape options.

- Choice of 3 cape materials.
- Large welding auto darkening filter with 1.1.1.1 rating.
- Light weight welding visor weights only 0.85kg (1.87lb).
- Replaceable impact lens.
